

Speakers

D-60LP

The D-60LP is our lowest profile speaker. It is designed for mounting where height is a concern.

Specifications:

Size: 7" L / 7" W / 4.75" H **Output:** 100 Watts
Weight: 8.25 Lbs. **Impedance:** 11 Ohms

D-60RBB / D-60RBS

The D-60RBB/D-60RBS are our most compact 100 watt speakers. They are designed for mounting on motorcycles and applications where mounting space is limited. The D-60RBS has an electropolished bell housing.

Specifications:

Size: 6" Dia. / 7" Depth **Output:** 100 Watts
Weight: 8.5 Lbs. **Impedance:** 11 Ohms

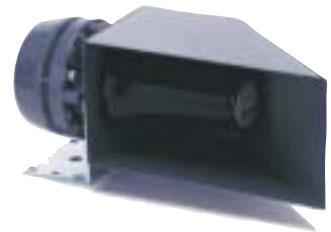

D-30

The D-30 is the ideal speaker for concealed mounting. Having a width of less than five inches, this speaker will fit into narrow spaces. Its rugged design will stand up to all types of environmental conditions.

Specifications:

Size: 12.75" L / 4.63" W / 4.75" H **Output:** 100 Watts
Weight: 12 Lbs. **Impedance:** 11 Ohms

D-10

The D-10 is designed for exterior mounting. The grey fiberglass bell housing gives wide angle sound dispersion while providing high weather resistance.

Specifications:

Size: 12 L / 14" W / 6" H **Output:** 100 Watts
Weight: 12 Lbs. **Impedance:** 11 Ohms

D-2000

The D-2000 was specifically designed to be mounted in the Aerostar™ series light bars. Its low profile allows it to be placed in spaces where minimum height is a consideration. The elongated tip provides for enhanced sound performance.

Specifications:

Size: 10" L / 8" W / 5" H **Output:** 100 Watts
Weight: 8.5 Lbs. **Impedance:** 11 Ohms
